

TECHNOLOGICAL EDUCATION MULTI-SESSION PROGRAM

Admission Requirements

Qualifications and assessments of individual academic/work experience combinations are made by the Faculty, and require proof of related postsecondary skilled work. The number of years of work experience needed for each academic background is as follows:

- Related university degree: A minimum of 2 years experience
- Related college diploma (3 years): A minimum of 2 years experience
- Related college diploma (2 years): 3 years experience
- 1 year of a 2-3 year related college diploma: 4 years experience
- Tradesperson (Secondary School Graduation Diploma): 5 years experience

**Please note that 1 year equals 1700 hours*

Selection is based on the application requirements in TEAS Requirements for Queen's (<https://www.ouac.on.ca/guide/teas-queens/>) as well as the supplemental documents submitted to Student Services. See How to Apply (<https://educ.queensu.ca/teacher-education/consecutive/tech-multi/apply/>).

Candidates choose from the following Broad-based Technology (BBT) areas:

- Communications Technology
- Computer Technology
- Construction Technology
- Green Industries
- Hairstyling and Aesthetics*
- Health Care
- Hospitality
- Manufacturing Technology
- Technological Design
- Transportation Technology*

*Applicants for Hairstyling and Aesthetics or Transportation Technology require a Certificate of Qualification because they are compulsory regulated trades.

Applicants must provide proof of competency in the same Broad-based Technology area to which they are applying in order to teach. This proof is a combination of both academic

background and skilled work experience in the same Broad-based Technology. Your work must have been:

- in business or industry
- in a location where work would regularly occur
- monitored, supervised and assessed or evaluated formally documented.

The following do not count as work experience:

- observing a skilled tradesperson or observing at a work site
- touring a facility
- attending a trade show
- volunteering, such as with Habitat for Humanity
- supervising, unless you used knowledge and skills directly related to your technology area.

When you complete our Teacher Education program, you will be prepared to teach all broad-based technology areas at the Intermediate (grades 9/10) levels, and courses in the broad-based technology area that you are seeking qualification the Senior (grades 11/12) level.

For more information about secondary school courses, see the following Ministry of Education curriculum documents:

- For Grades 9 and 10: The Ontario Curriculum, Grades 9 and 10: Technological Education, 2009 (PDF 687 KB) (<https://www.edu.gov.on.ca/eng/curriculum/secondary/teched910curr09.pdf>)
- For Grades 11 and 12: The Ontario Curriculum, Grades 11 and 12: Technological Education, 2009 (PDF 1,460 KB). (<https://www.edu.gov.on.ca/eng/curriculum/secondary/2009teched1112curr.pdf>)

If the content of the secondary school courses you examined matches your technical background AND a minimum range of 2 to 4 skill sets in one Broad-based Technology, then you should apply to that Broad-based Technology.

If your technical background does not match the content of the secondary school courses you have examined, start this process over to consider another Broad-based Technology.

If you do not find that there is a course that matches your technical background, then you do not have the technical background to apply for a teacher education program in

Technological Education. The Ontario secondary school curriculum does not address all technical fields.
