

CHEMICAL PROCESS AND BIOENGINEERING SUB-PLAN: TECHNICAL ELECTIVES

TECHNICAL ELECTIVES

Should a course on the technical elective list already be a core course for a sub-plan, then that course is excluded as an elective for that sub-plan. For example...

- CHEE 340 and CHEE 342 are core courses for the CHE2 sub-plan and thus cannot be counted as electives.
- CHEE 323 is a core course for the CHE1 sub-plan and thus cannot be counted as an elective.
- APSC 250 has CHEE 229 as an exclusion (a core course taken by CHE2) and thus cannot be counted as an elective.
- APSC 303 counts as a Group A Technical Elective or List B Complementary Study upon successful completion of internship.

PLEASE NOTE: Some of these elective courses may not be available to students due to pre-requisite course requirements. The student is responsible for confirming that he/she has the necessary prerequisites or permission of the instructor.

PLEASE NOTE: Course availability and the term in which a course is held can change from one academic year to the next. This can occur due to instructor availability or a change to departmental resources. Please refer to SOLUS to find out if the TECH course is offered this upcoming year.
