Electives (Classes of 2024)

The Geological Engineering student requires a total of 17.5 **Technical Elective (TE) Credits** (210 AUs). These are typically, (but not exclusively) taken as 5 TE elective courses with a minimum average of 3.5 Credits or 42 AUs per course. These courses can be taken at any point during the program to accommodate timetabling but normally only in third and fourth year. Students should plan to ensure that prerequisite and corequisite requirements are met for the full suite of TE or CS electives they wish to take during their program. Students should note that a reduction of total course load to less than 80% of the normal load may prevent them from holding Queen's University scholarships.

It is mandatory that at least 7 Credits of Technical Electives (TE) be taken from the following list:

Code	Title	Units
APSC 381	Advanced Design and Skills for Innovation	3.50
APSC 480	Multi-disciplinary Industry	9.00
CIVL 215	Materials For Civil Engineers	4.50

Complementary Studies

Refer to the Complementary Studies section of this calendar for courses that may be taken for all Engineering programs. For the Geological Engineering Program, the Engineering Economics course is APSC 221 Economic And Business Practice, and the Communications course is APSC 293 Engineering Communications in addition to first year program and the three Complementary Studies courses (as above): 3 credits from List A and 6 credits from Lists A or B.
