

# CHEMICAL ENGINEERING - MASTER OF APPLIED SCIENCE

---

The minimum requirements to be fulfilled are 4 term courses, a department seminar and a thesis. Two graduate courses must be from within the Department of Chemical Engineering, unless otherwise approved by the research supervisor and departmental graduate coordinator. One term length senior (400-series) undergraduate course, OR one combined undergraduate/graduate course (also known as a double numbered 400/800 course) may be accepted as the equivalent of a graduate course from any discipline for an M.A.Sc. student provided that

- a) the course is approved by the student's supervisor and
- b) the student has not received credit for a similar course in their Bachelor's program.

All students must take CHEM 801 Safety in the Laboratory, a non-credit course in laboratory safety, at the first opportunity after their initial registration, and also participate in CHEE 897, the departmental seminar series. All programs of study must be approved by the department.
