

CIVIL ENGINEERING - MASTER OF APPLIED SCIENCE

The minimum requirements for the M.A.Sc. program are four term-length graduate courses or their equivalent plus a satisfactory thesis successfully defended. One term length senior (400-series) undergraduate course, OR one combined undergraduate/graduate course (also known as a double numbered 400/800 course) may be accepted as the equivalent of a graduate course from any discipline for an M.A.Sc. student provided that

- a) the course is approved by the student's supervisor and
- b) the student has not received credit for a similar course in their Bachelor's program.

Students whose undergraduate degrees are not in Civil Engineering may be admitted at the discretion of the potential supervisor. Make-up courses in particular areas of undergraduate Civil Engineering may be required and one of these may or may not contribute to the course requirements.
